STREET VACATION PROCESS

PETITIONER INFORMATION SHEETS

City of Renton • Technical Services Section
1055 South Grady Way • Renton, WA • 98055
Phone: 425.430.7209 • Fax: 425.430.7241

Any property owner whose land abuts upon any street or alley within the City may petition the City Council for the vacation of all or part of such street or alley. The petition shall be on a form prescribed by the City. Persons interested in seeking a street vacation should call the Technical Services Section for information and possible alternatives, as a vacation may not serve their desired purpose. The following information sheet provides information on the typical steps in the street vacation process and the timeframe for each step.

EARLY CONSULTATION: Prior to submitting a petition, the applicant should informally discuss the proposed street vacation with the staff of the Technical Services Section. The Technical Services Section staff will provide assistance and answer specific questions about the City's Street Vacation Process. To contact the Technical Services Section staff, please call 425.430.7209.

GENERAL INFORMATION: Right-of-way is property that is encumbered by a public easement and administered by the City. The City often acquires right-of-way for the provision of public passage and for utility corridors. When a street is vacated, the public easement encumbering the underlying title is extinguished. Please note, however, that this does not necessarily mean that the property will be completely unencumbered of public easements. In many cases, the property may remain encumbered by other easements should the City choose to retain easements for the construction, repair and maintenance of public utilities and public services.

After a street vacation takes effect, the vacated right-of-way is distributed to each abutting property owner according to the law. In most cases, the abutting property owner's share in the newly vacated street extends the owner's current property lines to the centerline of the street or alley. However, this is not true in all cases.

Finally, please be aware that potential vacations are reviewed with the public interest in mind. Future and existing uses of the right-of-way are examined for access, traffic circulation, utility lines, safety concerns, and other land use issues. **A public benefit of a long-term nature must be provided by the vacation.**

◆ THE PETITION CHECKLIST

TIMEFRAME: VARIES - depends on time required for petitioner(s) to obtain and submit signatures, map and legal description

[Note: It is recommended that the petitioner(s) obtain the signatures of all (100%) of the owners whose property abuts upon the part of the street or alley to be vacated. + a concurrent three to eight (3-8) weeks for resolution to set and hold public hearing

- **SUFFICIENCY OF SIGNATURES:** Staff shall review the petition to determine if the sufficiency criteria have been met.

For the purpose of determining the sufficiency of signatures of "owners of private property" on the petition, or consent to vacate, the following rules shall govern:

1. The signature of an owner, as determined by the County Comptroller, shall be sufficient without the signature of his or her spouse.

2. In the case of mortgaged property or property subject to a contract of purchase, the signature of the mortgagor or the contract vendee, as the case may be, shall be sufficient.

4. In the case of property owned by the estate of a decedent or incompetent, the signature of the duly qualified personal representative or guardian shall be equivalent to the signature of the owner of the property.

In the case where the "owner of interest" cannot be determined, a current title report may be required to be furnished by the applicant, at the applicant's expense, for each abutting parcel of land.

(Ord. 3635, 6-7-1982)

- **SUFFICIENCY OF LEGAL DESCRIPTION:** Staff shall review the petition to determine if the legal description is sufficient. LEGAL DESCRIPTION GUIDELINES

- The objective of a legal description is twofold: first, to describe a land area in definite, accurate, and detailed terms to permit a competent person having no familiarity with the land to locate the boundaries of a piece of property; and second, to meet the legal requirements of conveying interests in real property from one individual to another. Although the definition is correctly stated as a “land” description, it is generally called a “legal” description because it must stand up under the law and litigation.
- There are generally **five** types of legal descriptions:
 - (1) A series of lines around the perimeter of an area known as a metes and bounds description; “metes” means bearings and distances and “bounds” means and refers to monuments both physical and legal.
 - (2) A boundary description stated totally by reference to other parcels already on record in the public repository. It merely makes ties by reference to the deeds of the owners adjoining each boundary line of the property being described.
 - (3) All or part of a section in the Public Land Survey System.
 - (4) A lot in a recorded subdivision.
 - (5) Strip descriptions for right-of-ways of pipelines, roads, etc. which may cross many parcels.
- The following guidelines consist of elements which are recommended for use in the preparation of legal descriptions. ***They are not intended to be all inclusive and may not be applicable in all situations:***
 - (1) **In a description of a lot, tract, parcel or portion thereof in a recorded plat, short plat, or record of survey:**
 - (a) Lot and block number or designation and addition or subdivision name;
 - (b) Official recording data and identification of recording office;
 - (c) Location by section, township, and range with respect to the Willamette Meridian, (if applicable);
 - (d) Property location by city, county and state.
 - (2) **In a description of an easement, lot, tract, or parcel described by metes and bounds:**
 - (a) Parcel location by the subdivision(s) of the section; or portion of any other official subdivisional tract from a Government Land Office (GLO) or Bureau of Land Management (BLM) plat; or portion of a recorded plat, short plat, or record of survey;
 - (b) Section, township, and range with respect to the Willamette Meridian;
 - (c) Property location by city, county and state;
 - (d) Direction and distance to GLO or BLM corners or properly determined section subdivision corners with description of the physical corners, if applicable;
 - (e) A description of the boundary giving:
 - (i) Place of beginning and/or initial point;
 - (ii) Basis of bearings or azimuths;
 - (iii) Bearings, angles or azimuths in degrees, minutes and seconds;
 - (iv) Distances in feet and decimals of feet or record units, where applicable;
 - (v) Curve data showing the controlling elements;
 - (vi) Identification of senior adjoiners giving recording office and filing reference;
 - (vii) Calls to existing controlling monuments, both artificial and natural;
 - (viii) Calls which indicate if a course is a section line, subdivisional line, a line of record or parallel therewith;

- (ix) A bearing and distance for each boundary line of the described parcel with a closing course returning to the point of beginning, except where the boundary can be described by a record, physical or natural feature.

(3) In a description based on a Public Land Survey System subdivision:

- (a) Special segregations such as donation land claims, homestead entry surveys, townsites, tracts, and Indian or military reservations;
- (b) Government lot number(s);
- (c) Aliquot part designation;
- (d) Section, township, and range with respect to the Willamette Meridian;
- (e) Property location by city, county and state.

(4) Other elements of consideration for any land description:

- (a) Avoid ambiguities when exceptions to a parcel are stated;
- (b) Indicate width of strip description and its relationship to described centerline or survey line;
- (c) Delineate the dividing line when designating a fractional portion of a parcel;
- (d) When designating one-half or other fractional portion of an aliquot part by government subdivision procedures, follow with "according to U.S. Government subdivision procedures."
